INFORMED CONSENT FOR CHIROPRACTIC TREATMENT

I understand that, as in the practice of medicine, in the practice of chiropractic care there are some risks to treatment, including and not limited to, fractures, disc injuries, strokes, dislocations and sprains. I do not expect the doctor to anticipate and explain all risks and complications. I wish to rely on the doctor to exercise judgement during the course of the procedure which the doctor feels at the time, based on the facts then known, and is in my best interest.

By signing below, I agree to the above and allow the doctor and/or intern, affiliated with Hoops Chiropractic, to perform such. This consent will cover the entire course of my treatment.

Patient Billing Acknowledgement Form MAINTENANCE/ELECTIVE CARE NOTIFICATION

Under your health plan, you are financially responsible for co-payments, co-insurance, or deductibles for covered services. You are also financially responsible for all non-covered services, including care determined to be elective or **maintenance**.

Maintenance/elective care is treatment that does not significantly improve a clinical condition. While being treated for a chronic condition, you may elect to receive care beyond that which is determined to be medically necessary (pain does not automatically prove medical necessity). You may also choose to receive maintenance care once maximum benefit from treatment has been reached.

Examples of maintenance care include: Treatment that seeks to PREVENT disease or PROMOTE health and enhance quality of life as well as MAINTAIN or PREVENT DERERIORATION of a *chronic* condition. Treatment should be actively helping a person to improve to be considered medically necessary. When care becomes supportive rather than corrective, treatment is considered to be maintenance. Treatment will also be considered maintenance when a patient has reached maximum therapeutic benefit (MTB) but continues treatment. Most treatments reach a point where no further significant improvement can be expected and this is called MTB. MTB can be reached when complaints either fully resolve or when pain and/or disability persist – even with ongoing treatment.

Most healthcare benefit certificates do not include coverage for treatment that is not resulting in a reasonable expectation of further improvement to a patient's condition.

If during the course of maintenance/elective care you develop a new condition or a previous condition becomes significantly worse, care may no longer be considered maintenance/elective and may then be covered by your health plan.

Unfortunately, your insurance has cracked down on treatment that they deem not medically necessary. We are forced to administer pain questionnaires regularly and preform re-exams to justify your care, by actively showing a positive response to your treatment here.

ASH (American Specialty Health) List of services to be paid for by member:

-	Massage	Prices may vary
-	Heat/E-stim	\$10 each
-	Ultrasound/Diathermy	\$10 each
-	Sports taping	\$10 per body region
-	Graston	\$20 per body region

I understand the above conditions for billing my health insurance. I understand that when my care is deemed for maintenance that I will be financially responsible for my care. If my condition changes or I have a new condition, I will inform the staff immediately to see if I am eligible for coverage under my health plan.
